PROFESSIONAL SUMMARY

Senior React Engineer with 5+ years of experience architecting and shipping scalable web and mobile applications using React.js, React Native, Next.js, and TypeScript. Proven track record of leading cross-functional teams, eliminating 190 days of technical debt in under four weeks, and delivering production-grade products across e-commerce, healthcare, fintech, and Web3 domains. Expert in modern state management (Redux Toolkit, Redux Saga, TanStack Query), third-party integrations (Stripe, Auth0, Salesforce, Weavr), and enterprise-grade code quality practices (SonarQube, ESLint, OWASP).

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/Sass

Frameworks & Libraries: React.js, React Native, Next.js, Umi.js, Redux, Redux Toolkit, Redux Saga, TanStack Query (React Query)

UI & Styling: Tailwind CSS, Material UI (MUI), Ant Design, React-Bootstrap, Bootstrap, Styled Components

Forms & Validation: Formik, React Hook Form, Yup

Authentication & Security: Auth0, Clerk, OAuth 2.0, JWT, OWASP, Snyk

APIs & Integrations: REST APIs, Axios, Stripe, Weavr, Salesforce, DUBOW, One-Source, Firebase, Google Maps API, Payment Gateways

Testing & Code Quality: Jest, Unit Testing, SonarQube, ESLint, Husky, Sentry

Tools & DevOps: Git, GitHub, GitLab, Bitbucket, GrowthBook, Internationalization (i18n)

Methodologies: Agile, Scrum, Jira, Linear, Wireframing, Work Breakdown Structure (WBS), PRD Documentation, Team Leadership

PROFESSIONAL EXPERIENCE

Senior React Engineer — Pikes Soft

Lahore, Pakistan | Apr 2022 – Present

Hansel Gifts (*Front-End & Mobile Lead Developer*)

- Led front-end development for Hansel web and React Native mobile applications, delivering seamless cross-platform feature parity across iOS, Android, and web
- Engineered core fintech features including gift card transactions, payment processing, and interactive gift wrapping/unwrapping user flows
- Integrated third-party services Weavr (banking infrastructure), Stripe (payments), and Auth0 (authentication), ensuring PCI-compliant data handling
- Built responsive, accessible user interfaces that improved navigation efficiency and user engagement metrics
- Maintained high code quality through peer code reviews and comprehensive technical documentation

Attendance & Leave Management System (*Mobile & Front-End Developer*)

- Architected the web and mobile boilerplate from the ground up, establishing a reusable foundation for long-term product growth
- Built a shared component library and implemented internationalization (i18n), GrowthBook feature flags, JWT, and OAuth 2.0
- Authored Product Requirement Documents (PRDs) and delivered accurate effort estimations using Work Breakdown Structure (WBS)

Digi-Lab (*Front-End Developer & Team Lead*)

- Built a digital medical records system using Next.js, Material UI, Redux Toolkit, and TanStack Query to support healthcare professionals
- Designed a tree-based directory structure that improved user navigation and engagement across the platform
- Developed a custom dynamic Form Builder (Google Forms-style) supporting 400+ specialized medical form templates
- Implemented a Dropbox/Google Drive-style folder and file management system with upload, preview, and sharing capabilities
- Led a cross-functional team to deliver the production application within a tight 6-month timeline
- Documented full project scope and produced detailed wireframes for stakeholder alignment

Corporate Merch (*Front-End Developer & Team Lead*)

- Developed a B2B e-commerce platform for bulk product shipping using Next.js, Redux Toolkit, TanStack Query, and Bootstrap with Sass
- Integrated third-party services DUBOW, One-Source, and Salesforce to streamline supply chain and CRM workflows
- Delivered key features including bulk purchasing, inventory tracking, print-on-demand ordering, and employee redemption workflows
- Automated the admin panel for one-click inventory listing, eliminating manual data entry and significantly reducing operational overhead
- Reduced technical debt from 190 days to 0 days in 20-25 days through focused refactoring and collaborative team execution

Almana Radiology (*Front-End Developer*)

- Built an industry-leading software ticketing system using Umi.js, Redux Saga, and Ant Design
- Developed an intuitive task-management and collaboration interface that elevated patient care standards
- Collaborated directly with stakeholders to align technical delivery with organizational objectives

Front-End Developer — Pend & Web

Lahore, Pakistan | Mar 2021 – Mar 2022

Alvar (*Front-End Developer*)

- Integrated a headless CMS with REST APIs to support dynamic content delivery across the platform
- Built a CMS-driven routing system and CRUD interface enabling non-technical users to create and manage new pages

Web3 Projects (*Front-End Developer*)

- Delivered front-end development for multiple Web3 / blockchain projects, building responsive interfaces for decentralized applications

KEY ACHIEVEMENTS

- Implemented company-wide clean coding standards adopted across all engineering teams
- Promoted from Engineering Level L1 to L3 within three months of joining
- Selected as Lead for the company-wide Fresher Trainee Program, mentoring new engineers
- Successfully completed multiple Proof-of-Concept (POC) projects adopted into production
- Consistently recognized as Top Performer every quarter since joining the company

EDUCATION

Bachelor of Science

Government College University

Faisalabad, Pakistan | 2017 – 2021
